Advertisement for Bids

HVAC System Installation – City Auditorium
City of Glennville, Georgia

The City of Glennville is currently accepting **sealed bids** for the installation of a new HVAC system at the City Auditorium. This project includes the **supply of all necessary materials, equipment, and labor** required to complete a full, code-compliant installation.

Sealed proposals must be received in the Office of the City Clerk at **City Hall, 134 S. Veterans Boulevard, Glennville Georgia**, no later than **2:00 p.m. (local time), Thursday, July 17, 2025**, at which time and place they will be **publicly opened and read aloud**. No submitted bid may be withdrawn after the scheduled closing time for receipt of bids for a period of **thirty (30)days**.

Specifications are available, for public inspection at City Hall or online at the City of Glennville's website: https://www.glennvillega.gov and the Georgia Procurement Registry.

Scope of Work Includes:

- Removal of existing HVAC components
- Installation of a new, energy-efficient HVAC system
- All required electrical and control systems
- System startup and testing
- Compliance with all applicable local, state, and federal laws, codes, and regulations

Bid Requirements:

- Proof of licensure and insurance
- Timeline for completion and cost breakdown
- Warranty information on equipment and workmanship
- Bid Bond, Payment Bond, and Performance Bond

All proposals must be accompanied by a **Bid Bond**, drawn in favor of the City of Glennville, Georgia, in the amount of **5% of the total lump sum bid**. This bond ensures that, if awarded the contract, the bidder will promptly enter into a contract and furnish both **Performance and Payment Bonds**, each in the amount of **100% of the contract value**, as required by law and approved by the City Attorney.

Failure to execute the contract and provide the required bonds within **ten (10) days** after notification of award will result in forfeiture of the Bid Bond to the City of Glennville as liquidated damages.

The **City of Glennville reserves the right to reject any or all bids** and to waive any informalities or technicalities in the bidding process.

City Auditorium HVAC Replacement Specifications

The contractor shall furnish all labor, material, and equipment necessary to:

- Demo / replace:
  - (2) Two existing 15-ton gas/electric HVAC package units
  - (1) One 7-1/2-ton gas/electric HVAC package unit
  - (1) One 5-ton split upflow gas/electric air conditioning system

New equipment shall consist of:

- (2) Carrier Model #48FEDM20-5 (17-1/2 ton)
- (1) Carrier Model #48FEDM08-5 (7-1/2 ton)
  - Refrigerant: 454B
  - Configuration: Horizontal supply/return
  - Features: Gas heat, louvered coil guard, manual outside air damper, programmable thermostat
- (1) Carrier 5-ton split upflow gas/electric air conditioning system
  - Refrigerant: 454B
  - Features: Coil guard, programmable thermostat

Notes:

1. All equipment shall be set on existing concrete pads.
2. Crane will be required to lift over obstruction to remove old and set new package units.
3. Manual outside air damper for package units: 0–25% (Field Installed).
4. All old equipment will become property of the contractor and shall be disposed of per environmental guidelines.
5. Suction and liquid line tubing for 5-ton split A/C system shall be replaced with hard drawn ACR type and sized per manufacturer guidelines. Suction line tubing shall be insulated with ½" wall closed-cell tubing.
6. All package units and the 5-ton split condensing unit shall be 208-230V / 60Hz / 3PH.
7. Replace and size disconnects for new equipment and install new watertight line voltage conduit/wiring from disconnects to equipment per NEC guidelines.
8. Modification of duct and hood cover for duct shall be installed per SMACNA guidelines.
9. Supply and return ducts shall have a canvas connection between duct and equipment.
10. All modifications of supply and return ducts shall be insulated with 3" foil-backed insulation, sealed with duct mastic and FSK tape.
11. Existing natural gas lines shall be modified to match up with new equipment.
12. All equipment shall be installed per Carrier specifications.
13. Warranty consists of:
    - 1st year: Parts and labor
    - 5 years: Compressor only

- 10 years: Heat exchanger
  (See Warranty Details)

14. See data sheets and certified drawings for HVAC equipment.

Conclusion

These specifications outline the complete scope of work for the HVAC upgrade at the City Auditorium, including equipment requirements, installation procedures, and compliance with applicable standards and guidelines. The contractor is expected to adhere strictly to the list of specific materials to be utilized as provided in the attached documentation. The contractor shall comply with these specifications in their entirety to ensure a professional, compliant, and successful installation.

Calculation methods used in this program are patterned after the ASHRAE Guide; other ASHRAE Publications and the AHRI Acoustical Standards. While a very significant effort has been made to insure the technical accuracy of this program, it is assumed that the user is knowledgeable in the art of system sound estimation and is aware of the tolerances involved in real world acoustical estimation. This program makes certain assumptions as to the dominant sound sources and sound paths which may not always be appropriate to the real system being estimated. Because of this, no assurances can be offered that this software will always generate an accurate sound prediction from user supplied input data. If in doubt about the estimation of expected sound levels in a space, an Acoustical Engineer or a person with sound prediction expertise should be consulted.

Output High Upflow:	**71,000**	BTU/hr

Furnace Performance

Certified Temp High Rise Range:	**25-55**	F
Certified ESP for Heat/Cool:	**0.15/0.50**	in wg
Airflow High Heat:	**1645**	CFM

The customer must ensure the specified airflow and static pressure are within furnace capabilities.

Electrical Data

Outdoor Electrical Data

Unit Voltage:	**208/230-3-60**	V-Ph-Hz
Fan Motor FLA:	**1.40**	Amps
MCA:	**21.4**	Amps
Max Fuse:	**30**	Amps
Operating Range Min:	**187**	V
Operating Range Max:	**253**	V
Compressor RLA:	**16.0**	Amps
Compressor LRA:	**110.0**	Amps

Furnace Electrical Data

Unit Voltage:	**115-1-60**	V-Ph-Hz
Unit MCA:	**13.9**	Amps
Unit MOCP:	**20**	Amps
